

HOW TO COMPLETE THE QUESTIONNAIRE:

This questionnaire asks about factors that may relate to a person's risk of developing cancer. Although we understand that some questions may be sensitive for some people, it is important to have complete data for scientific reasons.

- ◆ Read each question and the directions carefully.
- ◆ Use the enclosed pencil to write your answers neatly in the space provided.
- ◆ Erase cleanly any answer you wish to change.
- ◆ When checking boxes, be sure to put your check mark in the correct box.
- ◆ Answer each question unless instructed to skip or go to another question. Pay close attention to the written directions and arrows that direct you to the next appropriate question.
- ◆ After you have completed the questionnaire, put it in the postage-paid envelope provided and mail to:

Cancer Research Center of Hawai'i
University of Hawai'i at Manoa
Epidemiology Program, Attention: Family Registry
1236 Lauhala Street, Room 407

J. BACKGROUND INFORMATION

The questions in the following table ask about you, your biological parents, and your biological grandparents, including the country in which each person was born, the person's racial or ethnic background, and whether the person is of Jewish descent. These questions are asked because some diseases are seen more often in certain populations. For example, African Americans have a higher chance of developing sickle cell anemia, an inherited disease. Recently, it has been determined that persons of Ashkenazi Jewish decent may inherit genes which increase risk for breast and ovarian cancers. Family Registry scientists would like to determine if genes associated with colon cancer occur in different patterns in population groups, as this information may lead to earlier diagnosis. *(Please complete questions in ALL columns.)*
